BANG!

BANG!

I'm going to
stitch you
up now.

'm fine.

You got shot.
Stay still.

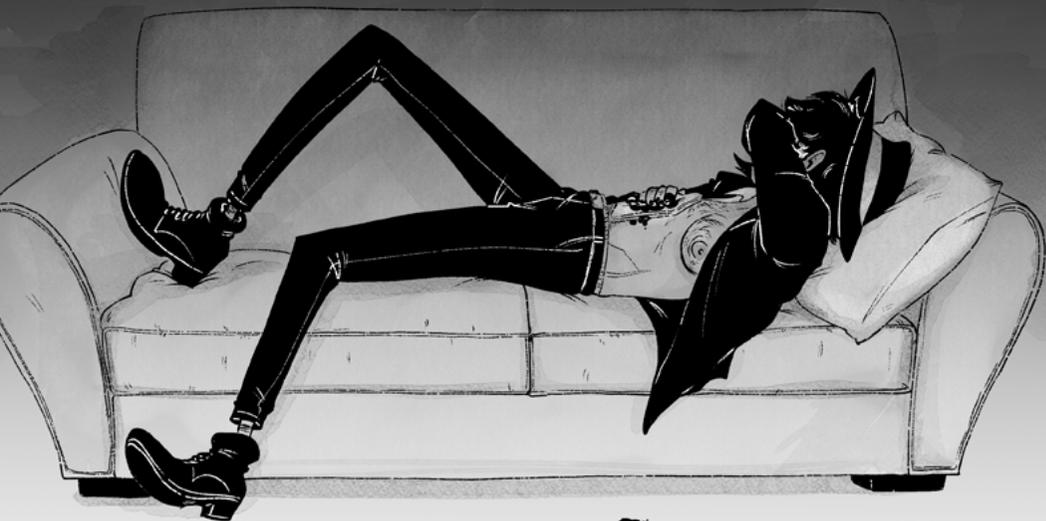

I can take care
of myself.

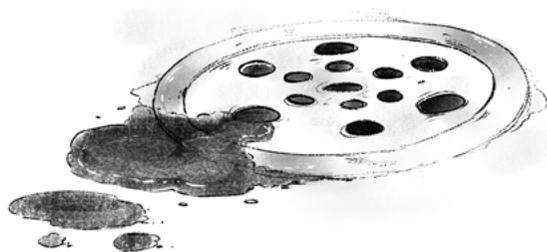

So.

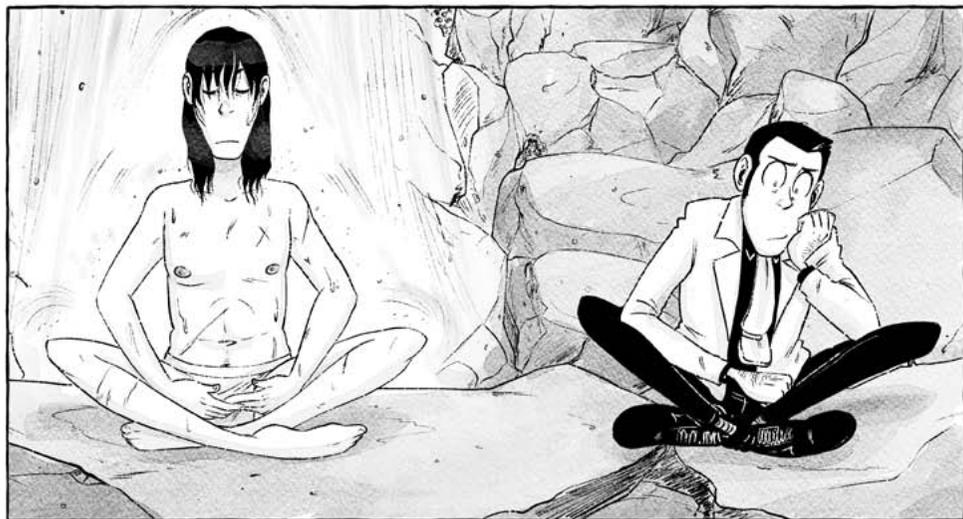

While this rose may
not compare to your
beauty, Jigen-chan -

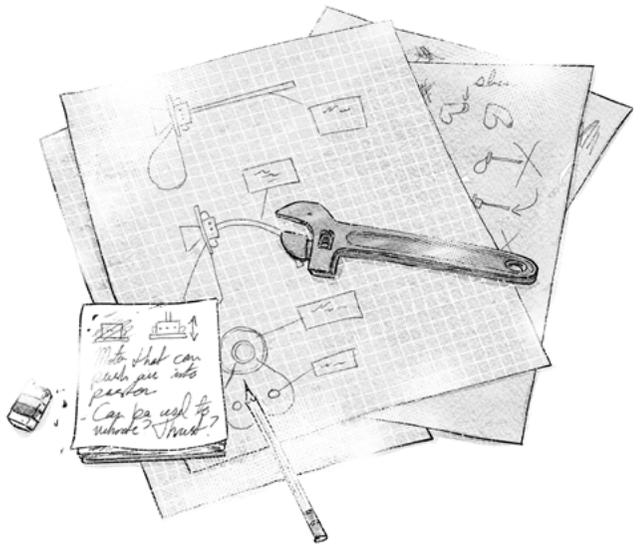

Jigen I've made you a dick!

So I was thinking about how you say you're a guy, even though you have a pussy, and I

So I did some research and did you know that is a whole name

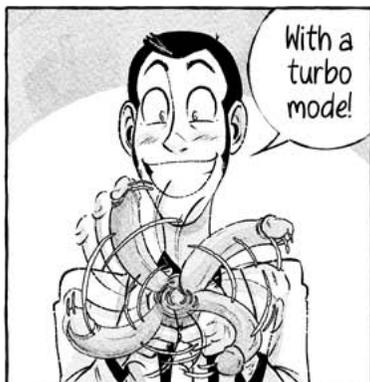

So I made you this dick so that you can fuck, and I can give you some pointers about that, learn from the best

- talked to Goem about it and he said stuff about your soul having a gender and made me re

Goem

if there's a bunch of people out there like you and some of them are real sexy ladies then I figured there's no reason not to just go with it!

- I put in all sorts of cool features so you have the coolest dick of any guy out there! (except for me of course)

Thanks for reading

Over Drinks

Was it really
that bad?

It had a **TURBO MODE**
that **SPUN** around!

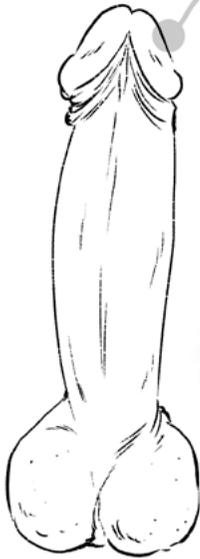

Finally, he realised

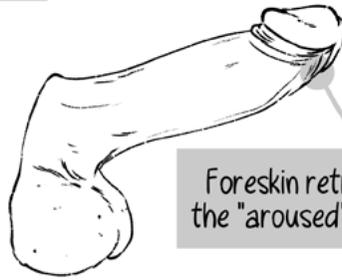

TURBODICK SPECS & FEATURES

Lupin III 

Realistic down to the smallest detail

Fine details
- Non-porous
- 4" flacid
- 5" erect
- Motorized
- Waterproof

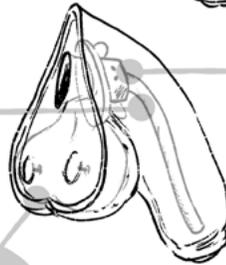

Foreskin retracts in the "aroused" position

The perfect dick!

4 inches long when flacid so you can impress your date!

Flexible air tube surrounds the piston to maintain the erection for endless stamina

Motor at base can be switched to provide stimulation to the wearer when in use

Air bladder in the ball sack provides discrete inflation

Vacuum seal at base keeps it on no matter the location or use

Fleshlight

On/off erection

Motor functions
1. Thrust
2. Sleeve stimulation
3. TURBOMODE

Testing confirms it stays in place even under a waterfall!

Michelle's thumbnails & script

Panels 1-4: Drops of blood, slowly spreading. As they get bigger, so do the panels.

Panel 5: Extreme close up, front view. A hand is adjusting a rear-view mirror. In the mirror you can see a reflection of empty road.

Panel 6: Medium shot, front view. Lupin and Jigen are sitting in the front of the car, centered in the page. Around them they are framed by the windshield and roof, a dark gradient spreading down from the top of the page to the top of the yellow fiat. Jigen is sitting in the passenger seat, both hands pressing against the growing blood stain at his side. Most of his face is covered with his hat but the bits we can see show that he's not doing well. He's sweating and pale and clearly in pain. Lupin beside him is driving (having escaped from whomever was chasing them) and is looking over at Jigen - he's concerned but his face is intense and a bit intimidating.

Panel One: Wide shot, front view. Having arrived at a non-descript safe house Lupin is helping Jigen walk in through the front door. Jigen is hanging off of Lupin's shoulder and struggling to keep himself upright, his one free hand still clutching at his bleeding side. Lupin is moving carefully, one hand out to keep the door open while the other steadies Jigen as he moves forward.

Panel Two: Medium shot, side view. Lupin is slowly helping Jigen lay down on the couch, basically the only thing supporting him at the moment. Jigen is very badly off, pale, sweaty, and barely able to move. Lupin's concern is growing and getting more visible on his face.

Panel One: Close up shot, side view. Lupin is leaning over Jigen's waist, looking down at the wound on his side. He's intent and focused (not freaked out like my thumbnail).

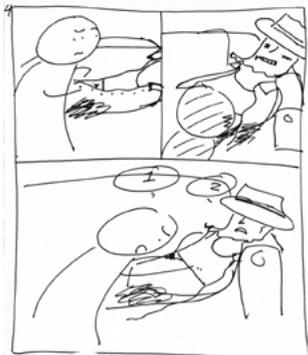

Lupin: "I'm going to stitch you up now."

Panel Two: Wide shot, side view. Jigen returns his focus on Lupin and is trying to convince him to leave him alone. His pale and strained face clearly undermines him - he needs help or he's going to die. Lupin is getting annoyed, assuming it's some kind of macho posturing, or that Jigen doesn't trust him (he's right, but not for the reasons he thought). We can see the couch Jigen is laying on, and the speech bubbles zag down from beside panel 1, leaving the bottom half of the page open for the illustration.

Jigen: "I'm fine."

Lupin: "You got shot! Stay still."

Jigen: "I can take care of myself!"

Panel One: Medium shot, side view. We can see Jigen's chest (head cut off?) and Lupin awkwardly unbuttons it. He is getting more frantic the most he sees, slowly and steadily losing his composure. As he is undoing the buttons we begin to see Jigen's binder. At this point it could be mistaken for an undershirt.

Panel Two: Medium shot, 3/4 view. Camera moves up to focus on Jigen, while Lupin has his back to the camera (slightly in shadow, the focus of this page should be on Jigen's face). He's grimacing as he watches what Lupin is doing and what he might find out. Struggling up slightly he is ineffectively trying to hold his shirt closed as Lupin continues to undo it.

Panel Three: Wide shot, side view. Lupin has Jigen's shirt completely undone and has turned his attention to Jigen's binder. He's giving it a tug but to his surprise it's not moving and he's getting frustrated. Jigen is struggling to control the situation, one hand on his wound, the other pushing back weakly against Lupin's wrist. He's scowling and still trying to convince him to leave him alone.

Lupin: "What the hell is this?"

Jigen: "Nothing. Fuck off."

Panel One: Wide shot, front view. Lupin, standing triumphantly in front of a bombastic background is holding a prosthetic dick aloft with great pride.

Lupin: "Jigen, I've made you a dick!"

Panel Two: Medium shot, 3/4 view. Jigen is standing silently, a wall of text floating behind him. Beside him an ellipses floats.

Note: the text block below should be cut and pasted into several different speech bubbles, and can (and should!) have sections cut from it. What Lupin is saying doesn't need to be coherent, just there. Fade the text out as well so that the image overlaid on top is clearly readable.

Lupin (off panel): "So I was thinking about how you say you're a guy, even though you have a pussy, and I talked to Goemon about it and he said some stuff about your soul not having a gender and that made me realize that if Goemon can understand this stuff than a genius like me should get it no problem! So I did some research and did you know that there's a whole name for this! And like a ton of other people like you are out there. So if there's a bunch of people out there like you and some of them are real sexy ladies then I figured there's no reason not to just go with it! So I made you this dick so that you can fuck, and I can give you some pointers about that, learn from the best after all! Arahahaha! So I put in all sorts of cool features so you have the coolest dick of any guy out there (except for me of course)"

Panel One: Medium shot, front view. Lupin, tucked to the side of the panel so that the prosthetic dick is the center of attention, is pushing something on the base of the flaccid penis. He is smiling and proud of himself as he shows off the features of his new invention for all four panels.

Lupin: "And if you press here..."

Panel Two: Medium shot, front view. Lupin is still holding up the now hard penis beside him so that it is the focus of the panel.

Lupin: "It gets hard!"

Panel Three: Medium shot, front view. Lupin has moved the penis so that he is holding it in front of himself. The penis, as promised, is thrusting back and forth by itself.

Lupin: "I put in a motor for thrusting..."

Panel Four: Medium shot, front view. The penis is spinning in front of Lupin in an unsettling manner. Lupin is undisturbed and proud of his genius.

Lupin: "With a turbo mode!"

Panel Five: Wide shot, front view. Full body view of Jigen and Lupin standing next to each other. Jigen is smiling with a hand on Lupin's shoulder - he's taken the olive branch that this dick represents, but has one hand in his pocket, a bit disturbed by the turbo mode. Lupin is holding the (thankfully still) dick in his hands and beaming with pride. It's obnoxious, particularly with his final line, but in an endearing way.

Jigen: "Thanks, bud,"

Lupin: "I modeled it on my own dick so you know it's perfect."
